

Electrical Safety - Maniac

- Video
- SCORM

Every year thousands of injuries are reported that are due to electric shocks, or due to burns that occur as a result of electric arcing or explosions, or from fires that are caused by electrical faults

This training course will provide information on the dangers of working with electricity and how to assess the risks involved.

Course Content:

Introduction

- Electric Shocks
- How is electricity made
- How much is too much?
- Electricity at work
- The power of electricity
- Electrical equipment
- Electricity and the body
- Portable equipment
- The Sweat of the Maniac

The training course features our 'Maniacs' in a series of situations that you wouldn't want to find yourself in.

Experiments include:

- Electricity and the human body
- How an electric shock happens
- How much electricity is dangerous
- Electricity and water

Who is it for?

- Ideal for any worker exposed to electricity at work
- New starters
- Refresher training

Duration:

- 24 minutes
